The management of New Jersey's lands plays and important role in the DEP's overall environmental protection strategy. What we do to our land is intimately tied to our drinking water quality, wildlife habitat, potential for flooding, our recreational open space and tourism, and many other important quality of life issues.

If you are buying land; or building a home, store, or marina; you may be impacted by one or more of the protective programs administered by the Land Use Regulation Program. To learn more about these programs and how they protect our environment, access the links below:

- **Freshwater Wetlands** - Wetlands are commonly referred to as swamps, marshes, or bogs. Previously misunderstood as wastelands, wetlands are now being recognized for their vital ecological and socioeconomic contributions.
- **Stream Encroachment/Flood Plain** - The state regulates work in flood plains to protect the loss of life and property during flood events. The program minimizes flood damage by ensuring that buildings are placed in safe areas, and are constructed to withstand high water.
- **Coastal Permitting** (includes CAFRA, Waterfront Development and Coastal Wetlands) - New Jersey's coastline is a rich, diverse fabric of natural wonders that improve our quality of life and enrich our economy. Businesses, tourists, and residents are drawn to New Jersey's coast for its many economic and recreational opportunities. Hasty, uncoordinated development along the New Jersey shore has already had an impact on this fragile ecosystem.
- **Tidelands** - Tidelands, also known as riparian lands, are all those lands now or formerly flowed by the mean high tide of a natural waterway. These lands are owned by the people of the State of New Jersey. As a result, you must get permission from the State to use these lands, in the form of a tidelands license, lease, or grant.

LUR does NOT handle the following programs:

- Septic system approvals: (609) 292-0407
- Land Use Enforcement: (609) 292-1240
- Dredging & marinas (tidal or inland): (609) 292-1250
- Threatened or endangered species: Endangered & Nongame Species Program

Application Information

Has your permit application been accepted or approved? Check the DEP Bulletin or call our Application Support Unit at (609) 777-0456.

Do you have a question about an application that you have already submitted? You should have received a letter from LUR (within 3 weeks of our receiving the application), including a file number and the name of a project review officer. Please contact the project review officer listed in the letter directly at the telephone number listed in the letter.

Do you have a question about a particular piece of property or a particular town or area? Please call directly to the phone number for your county in our "Contact LURP" page.

back to top

BEFORE YOU BUY - BEFORE YOU BUILD

Are you considering buying undeveloped land? Building a home, a retail center, or marina? How about putting in a driveway or an addition to your house? In every case, the presence of wetlands may affect where and whether you buy, build, or develop. In New Jersey and throughout the United States, wetlands ar protected on public and private property.

New Jersey protects wetlands under the New Jersey Freshwater Wetlands Protection Act, N.J.S.A. 13:9B. This law also protects transition areas or "buffers" around freshwater wetlands. New Jersey also protects coastal wetlands under a different law. See the pamphlet entitled Guide to New Jersey's Coastal Permitting Program if you are in a coastal area and think you may have coastal wetlands on your property.

back to top

WHAT ARE WETLANDS?

Wetlands are commonly referred to as swamps, marshes, or bogs. However, many wetlands in New Jersey are forested and do not fit the classic picture of a swamp or marsh. Previously misunderstood as wastelands, wetlands are now being recognized for their vital ecological and socioeconomic contributions.

Stream Encroachment Program

If you would like the following information in the form of a pamphlet, click here (Pdf Format).

- Before You Buy - Before You Build
- What Is The Flood Plain?
- Why Regulate Work In A Flood Plain?
- What Are The Floodway And The Flood Fringe?
- How Do I Know If My Property Is In A Flood Plain?
- What If I Want To Build In A Flood Plain?
- Are There Other Regulations I Should Know About?
- I Think I Need A Stream Encroachment Permit. What Do I Do?

BEFORE YOU BUY - BEFORE YOU BUILD

Are you thinking of buying property by a river for your new office building, store or shopping center? Or maybe you'd like to build a little cottage by a pond, lake stream? Maybe you want to expand your existing building or home and a small stream is in the way, or you need to cross a stream with your new driveway

In all these cases you are most likely in a flood plain and you probably need a Stream Encroachment Permit before you build. In New Jersey and throughout th country, building in areas subject to flooding is regulated to protect lives, property, and the environment.

New Jersey regulates construction in the flood plain under the Flood Hazard Area Control Act, N.I.S.A. 58:16A-50 et seq., and its implementing rules at N.J.A.C. 7:13.

back to top

WHAT IS THE FLOOD PLAIN?

The flood plain is the area adjacent to a stream, lake or pond, which is covered by floodwater when it rains. This area can shrink or expand depending on how much it rains. In general, the regulated flood plain is the area that would be covered by water during the "100 year storm' - a storm which has a 1 in 100 chan of occurring in any one year period.

back to top

WHY REGULATE WORK IN A FLOOD PLAIN?

The state regulates work in flood plains for two reasons. First, such regulation protects the person who is building from loss of life and property in case of a flo Flooding causes an estimated $3 billion of damage in the United States every year. State regulations minimize the damage by ensuring that buildings are place in safe areas, and are constructed to withstand high water.

The second reason to regulate building in flood plains is to protect other properties along the stream or pond from flood damage. When you build on a flood pl

Coastal Programs

If you would like the following information in the form of a pamphlet, click here (Pdf Format).

- Before You Buy - Before You Build
- Why Does The State Regulate Coastal Land?
- What Geographic Areas And Activities Are Regulated?
- Are There Any Exemptions?
- How Do I Tell If My Property Is Regulated Under The Coastal Permit Program?
- I Think I Need A Coastal Permit. What Do I Do?

BEFORE YOU BUY - BEFORE YOU BUILD

Are you considering buying property near tidal water? Building an oceanfront home, a retail center, or marina? Do you want to put in a bulkhead or a dock? Or maybe an addition to an existing house in a coastal town? In each of these cases, New Jersey's coastal permit program may affect where and whether you buy, build, or add on. In New Jersey and throughout the United States, coastal property is regulated to protect public safety and the environment.

New Jersey protects coastal waters and the land adjacent to them under a variety of laws, including the Waterfront Development Law (N.J.S.A. 12:5-3), the Coastal Area Facility Review Act (N.J.S.A. 13:19), and the Wetlands Act of 1970 (N.J.S.A. 13:9A). The Department of Environmental Protection (DEP) applies the New Jersey Coastal Permit Program Rules, N.J.A.C. 7:7, and the Coastal Zone Management Rules, N.J.A.C. 7:7E, to determine what may or may not be built under these three laws.

back to top

WHY DOES THE STATE REGULATE COASTAL LAND?

New Jersey's coastline is a rich and diverse fabric of natural wonders and economic engines that improve our quality of life and enrich our economy. Businesses, tourists, and residents are drawn to New Jersey's coast for its many economic and recreational opportunities. Coastal industries contribute enormously to New Jersey's economy. Coastal land provides crucial habitat for a wealth of wildlife, including migrating birds, commercially valuable fish and shellfish, and sporting and recreational species.

Yet our coastline is under threat from human activities. Hasty, uncoordinated development along the New Jersey shore has already had an impact on this fragile ecosystem. Regulation is necessary to prevent pollution, destruction of vital wildlife habitat, increases in rainwater runoff, and destruction of the natural beauty that attracts visitors. Regulation of coastal activities is also necessary in some cases to prevent loss of life and property from coastal storms, erosion, and flooding.

DEP Bulletin

The DEP Bulletin is published on a semi-monthly basis by the New Jersey Department of Environmental Protection and contains a list of construction permit applications recently filed or acted upon by the DEP. Interested persons can determine the status of: Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, Open Water Fill permits, Solid Waste Facility (SWF) permits, Stream Encroachment (SE) permits, Tidal Wetland permits, Waterfront Development permits, Treatment Works Approvals (TWAs) and New Jersey Pollutant Discharge Elimination System (NJPDES) permits.

The DEP Bulletin is in Adobe Acrobat PDF format. To view it, you need to download a free Adobe Acrobat reader from www.adobe.com (see below). When viewing the Bulletin on screen, some text may appear as gray lines due to its small size. To view this text, use the magnifying glass tool on the Adobe Acrobat toolbar to zoom in on the text. To print the Bulletin, use the printer icon on the Adobe Acrobat toolbar. Do not use the File/Print function within Internet Explorer or Netscape.

Individuals may obtain an annual subscription of 24 issues for a fee of $50. Checks should be made payable to **Treasurer, State of New Jersey** and mailed to:

NJDEP
Bureau of Revenue
P.O. Box 417
Trenton, NJ 08625-0417

Due to limited printing runs, the Department is unable to meet requests for hard copies of single issues of the DEP Bulletin and can only mail to annual subscribers. Please print the Adobe Acrobat versions of the DEP Bulletin, located below, for single issues.

Within DEP Data Miner, you will find a variety of reports that will provide you with up to the minute results. In order to provide flexibility, many of these reports require the user to enter some criteria, which will result in a customized document.
The DEP is dedicated to making environmental information readily available to our constituents while maintaining user confidence in the data. The information provided within NJDEP Data Miner and the viewing experience will continue to expand and improve as we work towards providing our constituents with an informative and easy-to-use environment.
The information contained in this site is the best available according to the procedures and standards of each of the contributing programs. The Depart
are regularly maintaining the information in their databases, in order to maintain the quality and timeliness of the data. However, unintentional i
The Department has made every effort to present the information in a clear and understandable way for a variety of users. However, we ca
misuse or misinterpretation of the information presented by this system. Therefore, under no circumstances shall the State of New Je
or omissions made from reliance on any information contained herein from whatever source nor shall the State be liable for any
reliance.

Below are a series of Searches which allow you to find one or more Sites or Individuals that are currently regulated by NJDEP. Once you have found your particular Site(s) or Individual(s), you can then find additional environmental information.

If you want to search for information by program or category, please click on the reports by category button above.

Search for Sites or Certified/Licensed Individuals by Location

Find the Sites or Certified/Licensed Individuals regulated by NJDEP in your County/Municipality and obtain inspection results, status of permit applications/registrations, and other environmental data.

Search by multiple fields

Search by County: Atlantic

OR

Search by County/Municipality: Atlantic/Absecon City

OR

Search by Zip Code:

Search for Sites or Certified/Licensed Individuals by Name

Find the Sites or Certified/Licensed Individuals regulated by NJDEP based on Name and obtain inspection results, status of permit applications/registrations, and other environmental data.

Search by Name:

Search for Sites or Certified/Licensed Individuals by ID Number

Find the Sites or Certified/Licensed Individuals regulated by NJDEP based on ID Number and corresponding NJDEP Program. Use either Program/Program Interest ID or Program/Alternate ID and obtain inspection results, status of permit applications/registrations, and other environmental information.

Search by Program and Program Interest ID:

Program: Air

Search by Program and Alternate ID:

i-MapNJ njems

Welcome to **i-MapNJ NJEMS** (New Jersey Environmental Management System), an environmental mapping tool that can provide you with information about your neighborhood, county, or state (NJ). With this unique application, homeowners can find out what's in their backyard; and environmental organizations, planners, and builders can identify open space, various regulatory boundaries, sensitive lands, watersheds, and much, much more. This application was last updated July 2005.

"Notice to Users of Landscape Data"

Although the application is very user friendly, you might want to first review the Tutorials before diving in. Then take it for a test drive and see for yourself how much environmental information you can access. The amount of information available increases as you zoom in closer and closer on a particular area. This information, called "data layers," can be seen to the left of the map. After you have created your map, you can print it for future reference.

NJDEP offers training classes in i-MapNJ for the public. View our training page for upcoming session information.

Stop by this site often, as enhancements are planned for the near future, including an easy-to-use report writing tool and real-time air, soil, and water contaminant data from remediation sites.

If you have a question or comment, please send us an email and we will be sure to get back to you as soon as we can.

Please Note: i-MapNJ is best viewed with Internet Explorer 6.x or higher. i-MapNJ utilizes POPUP windows for display of query results. You may need to disable POPUP blocking software you have running on your computer to ensure proper functionality of this application. Important additional information for data is denoted by

NOTE: If the Internet version of i-MapNJ NJEMS at OIT is not available Launch the Internet version on SOL.

To begin using i-MapNJ, either control the map by using the tools above the map frame or choose one of the searches below:
Find an individual location
Find sites by specified criteria
Now point your arrow onto the layer that you have chosen to identify and click on that layer. A box (like above) will pop-up and identify your layer and some of its attributes for you!

I-Map Can also help you:

- Measure the distance between 2 points
  - Print out a map of the area you are interested in

This will become a very helpful and fun tool for you….

Now, try locating your own house and print a map of it.

Please take the time to fill out our online evaluation of our training course. Click below to begin:
